

Introduction to Computers

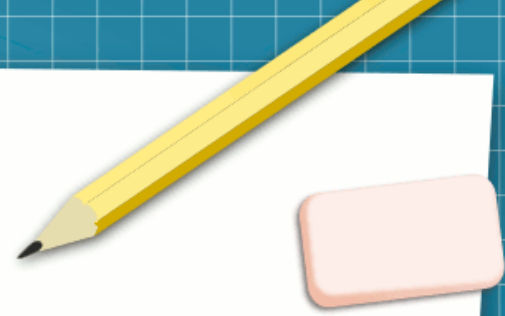

What is a Computer?

Which of these are computers?

Answer?

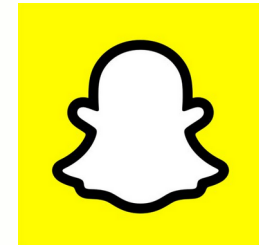

ALL OF THEM

Computers

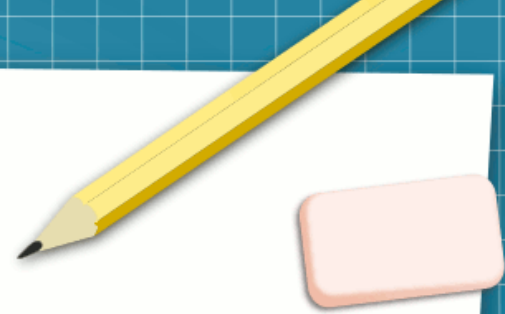

Hardware

Software

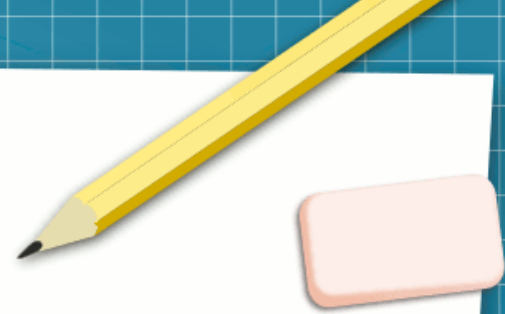

Computer Hardware

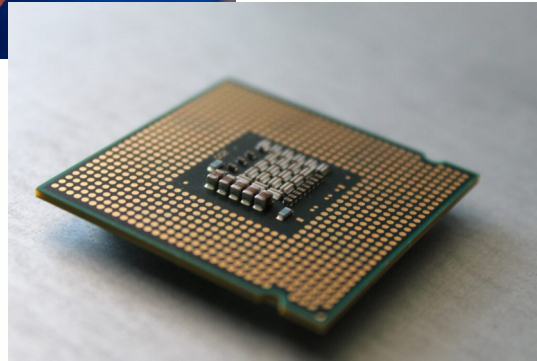

- Motherboard
- CPU (Central Processing Unit)
- RAM (Random Access Memory)
- HDD / SSD (Hard Disk Drive / Solid State Drive)
- PSU (Power Supply Unit)
- GPU (Graphics Processing Unit)
- Chassis (Case or Tower)

Motherboard

The Motherboard is the Main board that all/most computer components connect to.

CPU (Central Processing Unit)

The CPU is the Brain of the computer, and it can do complex calculations BILLIONS of times a second.

RAM (Random Access Memory)

RAM is like the short term memory for a computer, that is really fast to read and write to but forgets things when there is no power.

HDD/SSD

(Hard disk drive / Solid state drive)

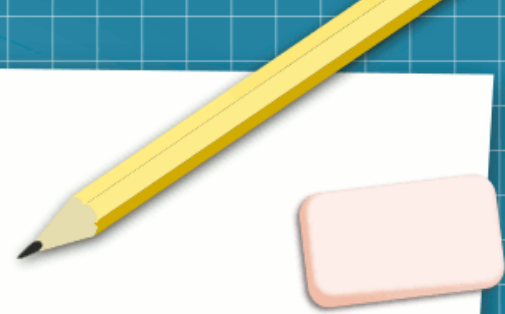

HDD

SSD

HDD/SSD are the long term memory for computer that saves data like your photos, videos, games to that remains when power goes from the system.

PSU (Power supply unit)

PSU is like the heart that gives life to all the components by pumping electricity to where it's needed.

GPU (Graphics Processing Unit)

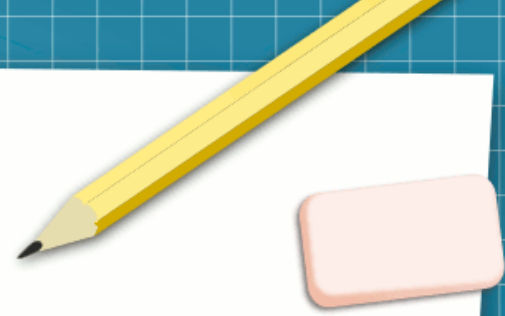

The GPU is like a CPU but dedicated to graphics. This piece of hardware does complex maths for graphics to display images on your screen hundreds of times a second

Chassis / Case

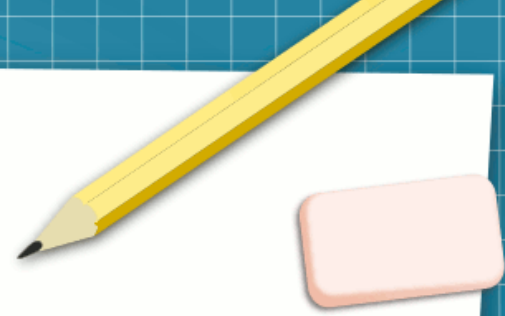

The case is the body that all the components live in.

Making a Computer

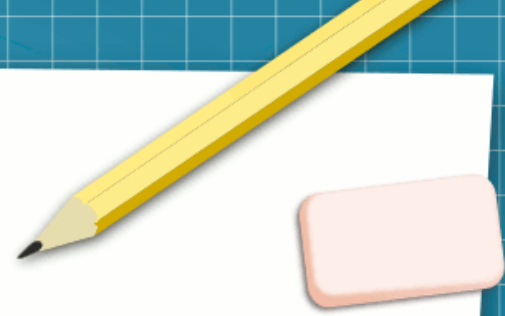

Software

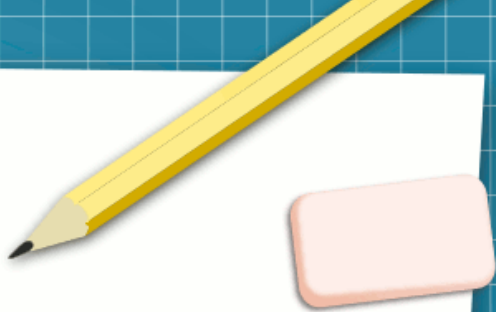

- Operating System
- Web Browser
- Games
- Video Player
- Word Processors
- Spotify
- YouTube

Software

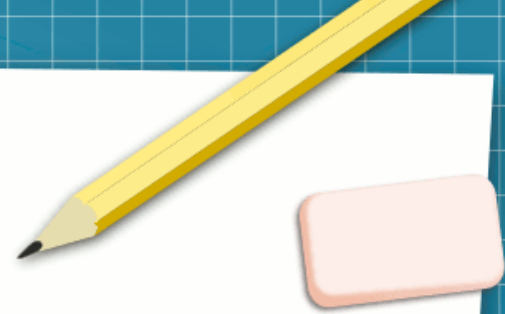

Software is the written programs that tell the computer hardware what to do. A Computer is only as smart as the program.

A yellow pencil and a pink eraser are positioned in the top right corner of the white paper, as if they are about to be used for writing or drawing.

Game 2

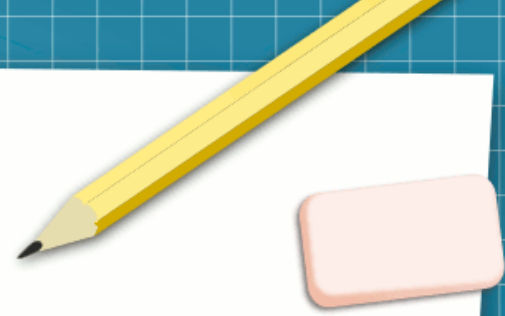

Making a Sandwich

Making a Sandwich

- 1) Get 1 plate out and put down in front of you
- 2) Get 2 slices of bread and put slices of bread side-by-side on plate
- 3) Grab Jam jar with left hand
- 4) With right hand grab Jam jar lid
- 5) Twist right hand clockwise
- 6) Put lid down next to plate
- 7) Grab knife by handle with right hand
- 8) Insert knife in jam jar until knife is 3cm in and knife scoop a blob of jam
- 9) Transfer blob of jam on knife to first slice of bread on plate
- 10) Using knife spread jam over left slice of bread
- 11) Repeat steps 8-10 on second slice of bread
- 12) Put knife down next to plate
- 13) Pick up right slice bread and place on top of jam coated left slice of bread
